(Lesson 95)

## Worksheet 52

### Writing Conversation

Write the following conversation correctly.

How do you prepare the ground in your greenhouse? asked Lester. We use a tiller to till the soil replied Dale. We plant the young tomato plants in rows, with two feet of space between the plants. Then Lester asked How do you irrigate the tomato plants? We lay a long thin plastic tube beside each row of plants. We also put down strips of black plastic to keep the weeds from growing added Dale. How do you tie up the plants inquired Lester further. Well, directly above each row of plants is a strong wire replied Dale. A piece of twine is tied to each plant, and the other end of the twine is tied to the wire. The plants climb up the twine, and we keep twisting the twine around the plants as they grow. All this is really interesting commented Lester. I may try it myself someday.

(Punctuation corrections are underlined. Also check for correct paragraph divisions.)
