Working with maps is emphasized in this course. In the pupil's textbook, the Map Index (shown on page 142) lists all the maps that are included within the pupil lessons.

Twenty traceable maps that relate to the lessons are provided in the back of the pupil's textbook. This map has been reduced 50% to fit on this page.

We recommend that students trace maps, since that in itself is educational. If you prefer to photocopy the maps, however, you may do so without contacting the publisher for permission.
